VOLUME XXXV NUMBER 11

DOMINION BUREAU OF STATISTICS, OTTAWA, CANADA

CANADIAN STATISTICAL REVIEW

NOVEMBER 1960

Contents:

Canadian Financial Statistics	Page 1
Seasonally Adjusted Economic Indicators.....	Page S-1
Statistical Tables.....	Page 1
List of Statistical Tables.....	Inside Back Cover

*Published by Authority
of the Honourable George Hees
Minister of Trade & Commerce*

Annual Subscription: \$5.00
Single copies: 50c. each

This review and other publications of the Dominion Bureau of Statistics,
including the free annotated catalogue of current publications, may
be ordered from the Information Services Division, Dominion
Bureau of Statistics, Ottawa, Ontario, and remittances
made payable to the Receiver General of Canada.

NOTE: Symbols used throughout the Review: (...) means "not available"; (—) means "nil"
or "less than can be shown with number of digits used"; (P) signifies preliminary; (*) indicates
"revised since last monthly issue"; (†) opposite the top entry in a column indicates that revisions
have been made to 1958 and in some cases to earlier years since the last issue of the Biennial Supple-
ment. Many of the 1957 monthly series have also been revised since publication of the Biennial
Supplement. Users wishing the most up to date historical series should therefore refer to the sources
listed in the individual tables of the C.S.R.

2204-501-110

CANADIAN FINANCIAL STATISTICS

Until recently there has been no central co-ordination of financial statistics in Canada. Whereas the Dominion Bureau of Statistics is the central federal statistical agency for the collection of statistics in many fields such as prices, employment, agriculture, manufacturing, international trade, education, health and welfare, the responsibility for the production of financial statistics has been divided among a number of government departments and agencies. For example, the Department of Finance publishes statistics on various aspects of the financial operations of the Federal Government. The Department of Insurance collects statistics on life and other insurance companies, small loan companies and certain trust and loan companies; the Department of Agriculture obtains data on credit unions; the Department of National Revenue collects balance sheet and other data from business; the Central Mortgage and Housing Corporation prepares estimates on the financing of new residential construction; the Bank of Canada produces a large volume of financial statistics, pertaining mainly to banking and the securities and foreign exchange markets; and the Dominion Bureau of Statistics obtains figures on the capital account of the balance of payments, consumer credit, pension plans and provincial and municipal finance. The statistics which these various agencies produce are in most cases designed to provide them with information which they need for discharging their specific administrative responsibilities. They have not been developed within any overall framework and consequently are difficult to fit together for financial and economic analysis.

Perhaps more serious is the fact that there are important areas where statistics are either lacking or inadequate; in others, where the coverage may be good and classification reasonably adequate, the time lags involved in collection and publication are so great as to make the figures of limited usefulness for current analysis. As far as their own responsibilities are concerned, the various administrative agencies have, in general, not felt any particular need for improving or speeding up the statistical information they have been collecting in these areas.

The lack of an adequate coverage of financial statistics is by no means a situation unique to Canada. However, in a number of other countries considerable progress is now being made in the development of this field.

In view of the demand for better financial statistics, not only for studying financial developments but also for their usefulness in economic analysis generally it seemed desirable to set up an informal interdepartmental committee on financial statistics. The Committee, which started its work in the Spring of 1959, was given the responsibility for reviewing the state of financial statistics and making recommendations on what action might be taken to bring about improvements. It is composed

of representatives of the Department of Finance, the Department of Trade and Commerce, the Bank of Canada, the Central Mortgage and Housing Corporation and the Dominion Bureau of Statistics.

The Committee had available to it the results of substantial investigation and reworking of financial statistics in Canada which had been undertaken in connection with two major projects, namely, the "direct" estimates of personal saving (in which personal saving was estimated by subtracting changes in personal liabilities from changes in personal assets); and, more important, the so-called National Transactions Accounts. The former project had been undertaken by the Bank of Canada, in cooperation with the Dominion Bureau of Statistics, and culminated in its publication in the *Statistical Summary* of the Bank of Canada; publication was discontinued mainly because of weakness in some of the underlying statistics. The National Transactions Account had been constructed for the years 1946 to 1954 for the Royal Commission on Canada's Economic Prospects to provide a statistical description of post-war capital markets in Canada.

The National Transactions Accounts represented a most useful standard classification system for the development of meaningful financial statistics which would be consistent internally as well as with available national income aggregates. It was agreed that the focal point of the Committee's efforts should be to fill in the gaps which would make it possible to answer important practical questions, such as, for example, how capital investment is financed.

The available information was examined from this point of view and it was concluded that the most serious gap is the lack of current balance sheet data of non-financial corporations. The only corporate balance sheet information now available appears in *Taxation Statistics*, published by the Department of National Revenue, which, while very useful, is inevitably late in preparation and not entirely satisfactory in classification. As a result there is inadequate current knowledge about changes in corporate liquidity or about the activities of the corporate sector in financial markets. Accordingly, it was decided to initiate a quarterly survey of corporate assets and liabilities, beginning with non-financial corporations. Pilot surveys have been carried out this year to test public reaction to the contemplated questionnaire. The results of these surveys indicated that quarterly surveys on a regular basis would be feasible.

Meanwhile, statistics available from financial institutions had been studied and it appeared evident that, with some exceptions, particularly the banks, current balance sheet information was lacking; and while in most cases the annual information was adequate it was much too late in coming out. The

banking system is reasonably well documented on an up-to-date basis although there are a number of problems. Most of the other financial intermediaries are pretty well covered on an annual basis but, except for a monthly sample of life insurance assets, and some quarterly data on instalment and other finance companies, there is little information on a current basis. While the annual information for insurance and trust and loan companies is fairly good it is very late in becoming available. In some cases little use has been made of the available data owing mainly to the fact that the information has not been organized in the most useful form for financial analysis.

In the light of the above, a draft questionnaire designed to cover, on a quarterly basis, trust, loan, investment certificate companies, instalment and other finance companies has been prepared and is at present being studied. It is also planned to consider in the near future what the best method may be for improving the information on other financial intermediaries.

Turning to the government sector, there is a good deal of information available on Government of Canada transactions on a current basis but much work is necessary to obtain statistics that can be used in conjunction with those of other sectors of the economy. Sources of information on provincial and municipal finances are much less adequate and little is available on a current basis. In the important field of government-owned enterprises—which account for over 10 per cent of total fixed capital formation—information on either an annual or quarterly basis is quite inadequate. Resources have recently been secured to strengthen the statistics, including balance sheet information, of government enterprises and provincial and municipal governments.

Another field which is being studied is that of mortgage finance. A large proportion of total mortgage instruments are held by financial institutions which publish annual or more frequent reports, and projectors based on mortgage registrations and direct surveys are used to obtain up-to-date estimates. However, information on mortgages held by persons, unincorporated business and non-profit institutions is very scanty and poor. It is believed that one-third of total mortgage debt outstanding is held by these sectors. Accordingly the possibility of improving the information in this area is being studied.

While no attempt is being made at present to produce up-to-date tables along the lines of the National Transactions Account, the filling of the gaps listed above will go a long way towards rendering feasible the regular production of such tables. Not only will information become available which is in itself directly useful but, in addition, estimation as residuals of certain components which are difficult to secure directly through surveys, for example the holding of financial assets by persons will be rendered more practicable.

However, regular publication of an up-to-date National Transactions Account will, in addition, involve solution of certain technical and conceptual problems which at the moment are receiving marginal attention only. For a detailed description of these problems and the National Transactions Account reference may be made to Wm. C. Hood, *Financing Economic Activity in Canada*, Royal Commission on Canada's Economic Prospects (Ottawa 1958) Part VI; and for a summary of the issues John A. Sawyer and Frank W. Emmerson "Estimates of Saving Prepared from Financial Transactions Accounts in Canada" paper presented to the Sixth Conference of the International Association for Research in Income and Wealth.

PRODUCTION*

The index of industrial production rose moderately in September. There was a noticeable increase in total manufacturing production, and particularly in the durables category. Electricity and gas and mining changed little.

‡Seasonally adjusted at annual rates.

(1)Gross National Product at market prices excluding accrued net income of farm operators from farm production.

EMPLOYMENT, EARNINGS AND HOURS WORKED*

The composite index of industrial employment declined slightly in September. Employment in manufacturing and construction was down but in mining there was a noticeable increase.

Average hours worked and average hourly earnings in manufacturing rose slightly in September.

Industrial Composite Employment (⁽¹⁾)	Manufacturing ⁽²⁾				Construction: Building and General Engineering ⁽³⁾	Mining (⁽⁴⁾)	Manufacturing		Average Hours Worked per Week in Manufacturing ⁽⁵⁾

⁽¹⁾Averages of unadjusted data.

⁽²⁾Employment indexes and average hours worked are compiled from data which relate to the last pay period of the month. The purpose of the moving average in the following charts is to indicate the underlying trend-cycle component as opposed to irregular factors. The moving averages are applied to the seasonally adjusted data and their lengths depend on a calculated measure called the M.C.D. or months for cyclical dominance.

LABOUR FORCE AND LABOUR INCOME

Total employment rose in October for the fourth straight month. Unemployment amounted to 7.6 per cent of the total labour force.

Total labour income increased in September but labour income in manufacturing was about unchanged.

Civilian Labour Force⁽¹⁾

	Employed					Index of Unemployed 1956 = 100	Labour Income

*More detailed information on retail trade, Seasonally Adjusted, can be found in Table 46.

⁽¹⁾Averages of unadjusted data.

⁽²⁾Source: Sales of New Motor Vehicles and Motor Vehicle Financing.

⁽³⁾Includes sales of new and used cars, trucks and bus repair parts and services, tires and tubes, storage batteries, gasoline, some farm implements and a small amount of wholesale trade.

CONSTRUCTION AND BUILDING PERMITS

Housing starts in October increased substantially but completions fell to the lowest level of the year.

Commercial building permits in September rose after a decline of six months.

New Residential Construction in Canada^(a)

Note.—Until the end of 1959, annual data for births, deaths and marriages are based on tabulated figures by month of occurrence on the basis of residence. Figures for 1960 are provisional and represent registrations filed in Provincial Vital Statistics offices during the month under review, regardless of the month of occurrence.
⁽¹⁾Not applicable to figures on population and immigration. ⁽²⁾Yukon and North-West Territories not included in figures for births, marriages and deaths.
⁽³⁾Estimates are now published quarterly following Census date, June 1, as well as for January 1 and July 1 of each year. ⁽⁴⁾Exclusive of stillbirths. ⁽⁵⁾In-

migrant admissions by country of last permanent residence. Annual and quarterly figures are totals for the period.

Sources: Monthly Report of Vital Statistics, D.B.S. and Department of Citizenship and Immigration.

^(a)The seasonally adjusted data include an arbitrary smoothing of crop production, standard seasonal adjustments for livestock items and a seasonal adjustment for earnings of the Canadian Wheat Board. Because of the arbitrary elements too precise an interpretation should not be given to the seasonally adjusted figures for this item. ^(b)Includes adjusting entry. ^(c)Includes residual error of estimate. ^(d)This item differs from column 5, bottom of page 6, in that it excludes undistributed earnings (and the inventory valuation adjustment) of the Canadian Wheat Board. ^(e)Excluding dividends paid to non-residents.

Note: For detailed description of concepts, sources and methods see D.B.S. Reference Paper (61-58) "Revised Index of Industrial Production, 1945-57." 9

(1) The M.C.D. (months for cyclical dominance) measure indicates the number of months required, on average, for the emergence of the cyclical trend from the seasonally adjusted series. An M.C.D. of 4 implies that a four month moving average of the series (dated at the second month) is required in order to offset irregular movements and allow examination of the underlying cyclical trend. The series in this table are not adjusted for M.C.D.

⁽¹⁾Includes workers on temporary lay-off.

Note.—These estimates are derived from a sample survey and are subject to sampling error. In general the smaller the estimate the larger is the relative sampling error.

⁽¹⁾Seasonal (formerly supplementary) benefit data included.⁽²⁾On last working day of month; claimants formerly classified as "short time" and temporary lay-off are included.⁽³⁾The number of new cases of recorded unemployment among insured persons.⁽⁴⁾Estimates are based on average weekly number of payments.⁽⁵⁾The number of calendar weeks during which a benefit payment was made.⁽⁶⁾Revised to relate to the Thursday nearest to the last day of the month.⁽⁷⁾Commencing with November 1958, figures exclude fishing benefit claimants during the seasonal benefit period. Adjustments have been made in figures for November 1957-June 1958 which included fishing claimants.

28 ⁽¹⁾The statistics for individual industries exclude strikes involving less than 100 workers. The total for all industries continues to include all strikes. ⁽²⁾The annual and monthly "all industries" totals for 1958 and 1959 have been revised and are no longer quite comparable with the data for individual industries, apart from the difference described in footnote (1).

⁽¹⁾In industries where long-term contracts involve the receipt of progress payments, all such payments are treated as sales. The series represents an estimated projection, on a monthly basis, of the latest available Census of Industry values. ⁽²⁾Total new orders received during the period, at estimated selling value. The series cover total New Orders, net of cancellations, regardless of whether the orders will be filled from stock or as a result of activity during the same month (and also be reported as shipments in the month received) or whether they will be added to existing backlog. ⁽³⁾Estimated total unfilled orders on books at end of month, irrespective of work done on them or of stocks from which they can be filled, but less progress receipts in industries working on long term contracts. Sales in these industries include progress receipts. Estimates are derived by inflating the monthly reported values to total for each industry on the basis of the estimated year-end total values for each industry as obtained from annual surveys. ⁽⁴⁾Manufacturing inventory owned by manufacturers, held at plant or plant warehouse at end of period.

⁽¹⁾Monthly totals are not equivalent to annual data which include Newfoundland and Yukon and North West Territories for which only annual statistics are collected.

⁽²⁾Total pulp production covers "screenings" which are already included in exports. "Screenings" are excluded throughout from mechanical and chemical pulp.

⁽³⁾Customs exports.

⁽⁴⁾Mill shipments destined for export.

46 Note.—The data in this table relate to rolling mills products only. Shipments to consuming industries of castings, forgings and steel pipe, previously covered, are no longer included.

⁽¹⁾Shipments for further processing within own firm and for sale in Canada.

⁽²⁾Because of the confidential provisions contained in the Statistics Act, comprehensive details of production and shipments of rolled steel products were not available for publication by months during the period of the strike at one of the major reporting plants. The figure published here is the total production for the last five months of 1958.

*Construction of dwelling units.

Note.—These data are the result of a nation-wide survey, for which the field work is carried out by the Central Mortgage and Housing Corporation. All Metropolitan Areas and Urban Centres with a population of 5,000 or more, along with certain other areas of high building activity, are enumerated completely. The remainder of the country is covered on a sample basis.

Note.—The data on building permits are collected for 1,014 municipalities and individual figures are available on request. Some of the annual totals for 1958 and 1959 differ slightly from the sum of the twelve monthly totals, due to the addition of statistics received too late to be included in the monthly data.

⁽¹⁾Data refers to city proper for Port Arthur, Fort William, Regina and Saskatoon; in other cases to metropolitan area.

⁽⁰⁾Monthly totals are not equivalent to annual data which include Newfoundland and Yukon and North West Territories for which only annual statistics are collected.

⁽¹⁾Includes planks and boards, flooring and square timber.

⁽²⁾Hollow blocks including fireproofing and load-bearing tile.

⁽³⁾For building insulation.

⁽⁴⁾Figures cover the production of firms which normally account for 85 per cent of the total for Canada.

⁽⁵⁾Includes concrete chimney blocks.

⁽⁶⁾Factory sales of firms which normally account for 90% of total Canadian production.

⁽⁷⁾Includes concrete pipes and fittings.

*See also Tables 18 and 19. ^aExcluding Newfoundland. Western grain prices used in the construction of the Index prior to August 1, 1959 are final prices. Since August 1, 1960, only initial prices are available for wheat, oats and barley. ^bIncludes subsidy on hogs. ^cBased on price for hogs including Dominion premium. A rise in ratio favours production of beef.

(1)Previous to January, 1968, quotations referred to steers up to 1,000 lbs. Now they refer to all weights. Sources: Livestock and Meat Trade Report, Dept. of Agriculture, Coarse Grains Quarterly, Cold Storage Holdings, and Index Numbers of Farm Prices of Agricultural Products, D.B.S.

* Short term loans outstanding extended mainly but not entirely to consumers and for other non-business purposes, by selected financial institutions. The table does not include loans of trust and loan companies, second mortgage loans on residential real estate and loans of some other financial institutions for which comparable data are not available.

⁽¹⁾Conditional sale agreements held in connection with the financing of retail purchases of consumer goods.

⁽²⁾Excluded from the above tabulation

are charge accounts and instalment credit of certain categories of dealers whose credit is extended mainly to farmers and other businesses rather than to consumers. Instalment credit includes conditional sales agreements only.

⁽³⁾In addition to the items shown here, quarterly figures are available on the use of oil companies' credit cards.

Balances were as follows:

June 1958-31 Sept. 1958-39 Dec. 1958-35 Mar. 1959-32 June, 1959-36 Sept. 1959-44 Dec. 1959-40

⁽⁴⁾Includes loans fully secured by marketable bonds and stocks, home improvement loans, etc. Excludes loans to finance purchase of Canada Savings Bonds. Figures for dates other than year ends are estimated on the basis of the loans by twelve companies.

⁽¹⁾Data in this table refer to railways with annual operating revenues of \$500,000 or over. Monthly averages for 1958 and 1959 differ from the sum of the monthly data due to revisions which cannot be allocated by month. ⁽²⁾As of January, 1958, statistics include the British Columbia Electric Railway.

⁽¹⁾Bank of Canada deposits are averages of the juridical days in the month shown while Bank of Canada notes and Canadian dollar deposit liabilities are averages of the 4 consecutive Wednesdays ending with the second last Wednesday in the previous month and undivided profits as at the latest fiscal year-end.

⁽²⁾Including issues payable in foreign currency.

⁽³⁾Mainly deposits of foreign banks.

⁽⁴⁾Capital, rest fund

⁽⁵⁾Securities purchased direct from issuer with a term of less than one year at time of issue are classified as loans.

⁽⁶⁾Excluding Canadian day to day loans.

⁽⁷⁾Loans to grain dealers and exporters.

⁽⁸⁾Loans to finance purchase of Canada Savings bonds at time of issue.

⁽⁹⁾Total of foreign funds, short term foreign investments and other foreign currency assets less foreign currency liabilities.

⁽¹⁰⁾Including loans to instalment finance companies.

(a) Note Circulation of Bank of Canada and chartered banks, excluding notes held by chartered banks.
 (b) Subsidiary coin issued by the Mint less coin held by Bank of Canada and chartered banks in Canada.
 (c) Less total float, i.e. cheques and other items in transit (net).
 (d) At September 30, 1957, the deposit balance of religious, educational and welfare institutions used for business purposes, about \$140 million, were reclassified from "personal savings deposits" to "other non-savings deposits". The figures prior to September 30, 1957 are thus not comparable with those since that date.

Note.—This series gives total new settled-for ordinary insurance sales in Canada, exclusive of revivals, increases, dividend additions, reinsurance acquired and pension bonds without insurance. Totals are estimates projected from the sales reported by 32 companies operating in Canada representing 89 per cent of new ordinary insurance sales.

¹The Canada totals by months for 1958 and 1959 do not correspond to the sum of the provincial totals as revisions applied to the national total are not yet available for the provinces. Neither the monthly averages nor the monthly figures for 1958 and 1959 have been revised to agree with the Canada total.

Note.—The definition of profits before taxes is based mainly on the accounting definitions used by corporations. However, depletion charges are added back to net profits while Canadian dividends received are excluded from profits in order to avoid duplication. The term "profits" as used here means the total profits of all companies earning profits less the losses of all companies incurring losses. Estimates are based on profits as reported by a sample of all companies incorporated in Canada (excluding government-owned companies and incorporated co-operatives).

① Includes, in addition to the industries listed, Agriculture, Forestry, Fishing and Construction, Rubber, Leather, Non-Metallic minerals, Petroleum and Coal and Miscellaneous Manufacturing Industries.

② Includes, in addition to the industries listed, Tobacco, Rubber, Leather, Non-Metallic minerals, Petroleum and Coal and Miscellaneous Manufacturing Industries.

Note.—*Revised series with coverage limited to business failures under the Bankruptcy and Winding Up Acts, excluding individuals not operating businesses as such.

†In the Bankruptcy Act of 1949, provision is made for proposals from insolvent persons. Agreements made under this method are not included with the statistics of bankruptcies. Liabilities of insolvent persons making proposals are not available.

CANADA 1960 . . .

- Special feature articles
- Profusely illustrated
- Over 300 pages

CANADA 1960 embraces surveys depicting the nation's natural resources, its industrial development, domestic and international trade, transportation, the labour force, social, educational and cultural life, plus . . .

. . . *a panoramic description of the development of the nation's economy during the first 60 years of the 20th Century . . .*

. . . *a historical-geographical study of Canada's growth from colony to nation . . .*

Copies of *Canada 1960* are available from both the Dominion Bureau of Statistics and the Queen's Printer, Ottawa. Orders should be accompanied by postal money order or cheque made payable to the Receiver General of Canada.

\$1 Per Copy
